Case-Type Codes for Domestic Relations Proceedings
December 13, 2007
Page 2

You will be able to submit 2008 data to the Caseload Reporting System (CRS) using these deleted case-type codes. Once they are recorded using the new case-type codes for cases filed on or after January 1, 2009, these postjudgment transfers will not be considered new filings. Therefore, they should not be reported as new case filings when they are received by the court.

In addition, although the following case-type codes remain valid for purposes of filing, these cases are not reported for purposes of compliance with time guidelines: UF, UI, UM, UN, UT, and UW. Therefore, these case-type codes also will no longer be reported in Parts 1 and 2 of CRS. You will be able to submit 2008 data to the Caseload Reporting System (CRS) using these case-type codes, but for cases filed on or after January 1, 2009, these cases will not be reported on 2009 and subsequent caseload reports.

Accordingly, enclosed are the updated collection report (SCAO 31), file format for circuit court caseload, and updated conversion list for circuit court case-type codes.

File Formats for the Submission of Electronic Caseload Data Caseload Reporting System

1 Introduction

This document describes the record layout for submitting data electronically to the Caseload Reporting System (CRS). Data so submitted will be imported into an Oracle database, and that data will then be used for generating reports. Courts with a caseload management system may be able to create the data file with relative ease, but the data file must conform to the following record layout in order for the CRS to understand the data and store it properly.

1.1 Submission Mechanism

The CRS includes web-based functionality to submit the data file online, meaning a court must be connected to the public Internet or the Supreme Court intranet. The user attempting to submit the data file will sign on to the application using a web browser. The user will enter a drive, path, and filename to select the file to be submitted, and the application will transfer the file to a JIS-based server. The submission will be recorded in a database, and the file will be processed. The user will then be able to view the submitted data using web-based data entry screens.

2 Electronic Data File Format

2.1 General Format

All data submitted electronically shall be in ASCII format, enclosed in quotes, and comma delimited; i.e., "xxxxxx", "xxxxxx", and so on. An empty field (") is considered null. Each record in the file will represent a single data value. A record is a series of ASCII characters terminated with a carriage return-linefeed character. The elements of each record will identify which data value it represents, so that the type of data (Circuit court) and the quarter, year, county, court code, as well as the part, section, bar number (Part 4 only), action, and case type combine to refer to a single field on a particular caseload report form. The bar number is required for Part 4; for Parts 1 and 2, the field of the bar number should appear as a value of 0. This record layout will require data to be written out redundantly, but allows each record to be dealt with independent of any other record in the file.

2.2 Record Format:

The format shall be as follows:

"TYPE","QTR","YEAR","COURT","COUNTY","PART","SECTION","BAR NUMBER","ACTION","CASETYPE","VALUE"

2.2.1 Field Definitions

"TYPE"	= Data Type: "C" (circuit)
"QTR"	= Report Quarter "1", "2", "3", or "4" (" 4 " indicates full year data)
"YEAR"	= Report Year "2002", "2003", etc.
"COURT"	= Court Number as defined below
"COUNTY"	= County Name that, along with the court number, identifies a specific court jurisdiction

File Formats for the Submission of Electronic Caseload Data
Caseload Reporting System

Last updated December 6, 2007; effective for 2009 and subsequent caseload reports.

"PART" = "1", "2", or "4"
"SECTION" = "A", "B", "C", etc.
"BAR NUMBER" = A 7 digit code as defined below
"ACTION" = A 2 to 4 digit code as defined below
"CASETYPE" = A 2 digit code as defined below
"VALUE" = Null value ("") or whole number value of 0 or greater

Examples: "C","1","2003","C10","Saginaw","1","E","0","BP","DL","5"
"C","1","2003","C10","Saginaw","2","E","0","BV","DL","12"
"C","1","2003","C10","Saginaw","4","E","P000000","A1","DL","2"

The first example is for circuit data ("C"), first quarter ("1"), year 2003, 10th Circuit Court ("C10"), the county of Saginaw, Part 1, Section E, 0 (since there is no Bar Number for Part 1), action Beginning Pending ("BP"), case type DL, with a value of 5.

The second example is for circuit data ("C"), first quarter ("1"), year 2003, 10th Circuit Court ("C10"), the county of Saginaw, Part 2, Section E, 0 (since there is no Bar Number for Part 2), action Bench Verdict ("BV"), case type DL, with a value of 12.

The last example is for circuit data ("C"), first quarter ("1"), year 2003, 10th Circuit Court ("C10"), the county of Saginaw, Part 4, Section E, Bar Number (as required for Part 4), action dismissed within 84 days, juvenile detained ("DP1"), case type DL, with a value of 2.

This format provides flexibility when submitting the data so that there are no expectations about groups of records; each one is considered independently. It is possible, though improbable, that probate, circuit, and district data can be intermixed, record by record, and that the values can be listed in no particular order regarding their section, part, action, or case type. It is likely that the reports used to create a data file will create the records in sequence; for example all the part 1 data listed from section A through the last section, and all the actions and case types grouped together. This approach duplicates what might be considered header information on every detail line.

2.2.2 Field Names, Attributes, and Length:

<u>Field Name</u>	<u>Attributes</u>	<u>Max Length</u>
TYPE	Alphabetic	1
QTR	Numeric	1
YEAR	Numeric	4
COURT	Alphabetic, Numeric	5
COUNTY	Alphabetic	25
PART	Numeric	1
SECTION	Alphabetic	1
BAR NUMBER	Alphabetic, Numeric	7
ACTION	Alphabetic	4
CASETYPE	Alphabetic	2
VALUE	Numeric	6

2.2.3 Submission of Files

The electronic files may be submitted repeatedly in order to correct or complete the data. That is, if a particular field is missing, or has a null value (""), the submission will be accepted, and the data available will be processed.

Subsequent submissions will overwrite the existing values in the database unless the append feature is selected. However, if a field in the submitted file has a null value ("") it will be ignored, and the existing value in the database, if any, will remain. Similarly, missing values in subsequent submissions will not affect existing values in the database. Any non-null values (zero or greater) will be used to overwrite existing data for that court, in that year, and the particular quarter.

2.2.4 Court Codes and Counties

The following table lists the court codes and their corresponding counties; jurisdictions are included to further define each court. The court code and county together create a unique identifier for each jurisdiction. Data must be submitted as an aggregate for the jurisdiction, as listed below. Data will be reported for each of the jurisdictions; however, totals will not be combined for multi-county courts; i.e. "C19", which contains data submitted from two counties.
